**** Remarks:

- Interference might occur among groups. For best interference-free operation, please use frequencies in the same group (ex. Group 1 only, Group 2 only, etc.)
- If interference occurs while using same group, please use another group for ALL receivers.
- Group 0 is for testing purpose. Please do not use the 3 channels simultaneously.

8 non-interference operation at the same installation:

- **Group 1 ~ 6:** Each has 8 non-interference channels inside each group. However, the distance between 2 transmitters must be at least 30cm.

12 non-interference operation at the same installation:

- **Group 7 ~ 9:** Each has 16 non-interference channels inside each group. Ascertain microphones are, at least, 3 meters away from receivers. However, the distance between 2 transmitters must be at least 30cm.
