

DE 4348

The DE 4348 is a high performance multichannel processor that forms unique packages with Sonodyne active speakers. It is also very useful in custom installation for mini cinemas and corporate boardrooms

- HDMI/4K (2160 x 3840)
- On screen display (OSD)
- High performance preamplifier with 7.2 unbalanced & balanced output
- RS 232 control
- 32 bit (TI, CO.) DSP decoding: Dolby TrueHD/ Dolby Digital Plus/ Dolby Digital/ DTS-HD Master Audio/ DTS ES

DE 4380

The DE 4380 is a 8 channel power amplifier that delivers 100 watt per channel at less than 0.5% THD. A compact and fanless D Class design, it runs cool and efficient. It accepts both unbalanced RCA as well as balanced XLR inputs and outputs are rugged binding posts. Both table-top and rack mountable, it is ideal for home theatre and commercial installation application

- High power: Unclipped 100W RMS into 4Ω, all 8 channels driven together, total of 800W RMS
- SMPS With Active Power Factor Correction
- Class-D amplifier design with 90% efficiency
- Exhaustive protection- short-circuit, overload, overheat, RFI
- Balanced And Unbalanced Inputs
- Status and clip indicators for each channel, can be switched off
- Auto-power on and off through signal sensing
