

The CUB-33 is a professional tabletop microphone featuring the popular C33 Gooseneck and a capacitive touch screen with integrated VU meter. This distinctive feature will display the microphone levels to indicate if the mic is clipping or if the microphone levels are too low. The mute button can be configured as push to mute or latch. Bottom heavy for added stability, the CUB33 is robust, and easy to set up. It is driverless and compatible with Windows and MacOS and is "mute-sync" compatible with the Zoom meeting app.

Features and Benefits:

- Mute Sync Compatible with Zoom meetings app
- USB Bus Powered
- Driverless: no drivers required (Compatible with Windows & MacOS)
- Capacitive RGB LCD touch screen for muting with optional VU meter view mode
- RGB Color Selection for Mute and Unmute
- Latching Mute and Push to Mute Modes
- Rugged tabletop metal enclosure
- Lockable with Kensington Lock
- Unobtrusive gooseneck slimline design.
- Superior grade components.
